Bio

Oksu is a leader of CSE(Climate, Sustainability & ESG) Team in Deloitte Korea. He has 10 years of experiences in the field of ESG/Sustainability, climate change and international development, in close collaboration with multilateral institutes, governments, public entities, financial institutions, and private companies, government of Korea and other countries, major banks and asset managers, multinational companies etc.

Oksu has led diverse projects in the field of climate finance, ranging from direct support to GCF(Green Climate Fund) on accreditation process and readiness program, strategic advisory on deployment of a new financial instrument of a development agency, knowledge sharing and strategic planning for promotion of public/private sector participation on climate finance, development of finance funding proposals and feasibility studies, national standard development for carbon accounting, etc. Oksu is also an expert in the field of green, sustainability, and ESG including national green growth strategy development, national Emission Trading Scheme (ETS) operation, ESG and decarbonization strategy development for public entities and private companies, renewable energy and electric mobility project development, pre/post-issuance assurance for Green, Social, and Sustainability Bonds and Loans.

One of his key achievements would be setting up of a national strategy for government of Korea to hold headquarter of GCF secretariat in Korea. Strengthening the relationship with the Korean government, he has been participating in UNFCCC COP (climate finance), Standing Committee on Finance, GCF Board Meetings, Global Environment Facility(GEF) Board Meetings, and Adaptation Fund Board Meetings as a member of advisory panel for Korean government.

Oksu has a work experience in more than 20 countries in every region including Vietnam, Indonesia, Myanmar, Kazakhstan, Pakistan, India, Sri Lanka, Peru, Honduras, Egypt, Uganda.
