

Ajay Sharma

**Manager, Connected Solutions (Asia Pacific)
Stryker**

Ajay Sharma has a distinguished career spanning over 20 years in the Medical Device industry, with a strong focus on connected healthcare. His extensive experience spans across the Asia Pacific, emphasizing his capacity to understand genuine customer needs and successfully launch products that advance healthcare in the Connected Care domain.

Ajay has more than 8 years of expertise in collaborating with large-scale public health organizations across ambulance services and hospitals (in Australia and New, where he played a pivotal role in designing, rolling out, and managing the groundbreaking LIFENET platform for cardiac reperfusion projects - a one-of-a-kind initiative in the world. In recent times, Ajay has demonstrated his leadership by spearheading customer pilots in Singapore, Taiwan, and Japan related to advanced Automated External Defibrillators (AEDs). These initiatives underline his commitment to pioneering future healthcare technology solutions.

Before joining Stryker, Ajay Sharma accumulated 13 years of experience at ResMed, a prominent medical device company specialising in Sleep Apnea, ventilation, and home diagnostic products. He held diverse roles in engineering, project management, and marketing, all related to medical devices and connected healthcare.

Ajay holds a Master of Computing, an MBA in Systems, and a Bachelor of Engineering (Electronics).
