Jungshik Jang

CTO, Yanolja Cloud

Jungshik Jang is the Chief Technology Officer (CTO) at Yanolja Cloud, where he leads the global technology for enterprise solutions focused on AI-driven travel technology, a key strategic direction for Yanolja. He is also dedicated to fostering technological synergy across Yanolja's various group member companies.

Jungshik joined Yanolja, a company aiming to become a Global Travel Tech Company, in August 2023 as the Head of Infrastructure. In 2024, he was appointed CTO of the Yanolja Platform, the consumer-facing platform, leading its technical division. He transitioned to his current role as CTO of Yanolja Cloud in 2025.

Before his tenure at Yanolja, Jungshik worked as a Staff Engineer for about a year at Moloco, an Ad Tech company, focusing on Cloud Ad systems.

Prior to that, he spent over 14 years at Google after joining the Google Seoul Office in 2007. During his extensive time at Google, he held various roles including Frontend Engineer, Backend Engineer, ML Engineer, and System Engineer across diverse teams such as Search, Blogger, Android, Chrome, Cloud, and Tensorflow.

Jungshik holds a Bachelor's degree in Computer Science from Korea University. His career in software engineering began during his undergraduate studies through a military service exemption program, working as a security software engineer at a startup. He then gained significant early experience as a Developer at Nexon for two and a half years, where he focused on online game development.
